Whole Foods Market
Quality Standards Overview
Opened in 1980, today over 340 stores in US, Canada and UK

Regional and local autonomy
- 12 regions, each with own leadership and buyers
- Each store is unique to meet the needs of its neighborhood

Mission driven company
- To provide a more natural alternative to conventional grocery options
Whole Foods Market Quality Standards

- Internal touchstone and foundation
- Buying guidelines for Team Members
- Educational tool for customers
- Establishes role as researcher, editor and filter
- Basis for consumer and Team Member trust
OUR BODY CARE QUALITY STANDARDS

We carry the finest facial, skin and body care products available because we believe the quality of the items and ingredients people apply to their bodies topically is as important as the foods and nutritional supplements they ingest.

We sell the highest quality personal care products available at the most competitive prices possible. We evaluate quality in terms of ingredients, pleasurable experience, and efficacy. Our search for quality is a never-ending process involving the careful judgment of buyers throughout the company.

- We carefully evaluate each and every product we sell.
- We are passionate about aromatic, luxurious, effective personal care products and the pleasure of sharing them with others.
- We encourage our vendor partners to use plant-based and naturally derived ingredients, pure essential oil fragrances, gentle preservatives and non-petroleum ingredients.
- We are committed to high-quality body care products that have a proven track record.
- We only sell personal care products that have not been tested on animals.
- We provide personal care products that support health and well-being.

Our stores carry hundreds of brands of products (in addition to our own Private Label brands) and the selection from store to store may vary. If you have a question about a particular product, please ask for assistance at the store where you shop.
# Body Care Ingredients We Don’t Sell

Currently, there are 50 ingredients common in conventional body care products that are not allowed in any body care products we sell. That includes phthalates, microbeads, triclosan, BHT, BHA, aluminum chloride hydrate, and many more. However, creating a product with no unacceptable ingredients does not guarantee that Whole Foods Market will sell it. Our buyers are passionate about seeking out the freshest, most healthful, minimally processed products available.

Premium Body Care
Premium Body Care: A History

• Launched in 2008 at a time when there were no other US standards for personal care products

• Original intent: to encourage more natural reformulations without having gaps on the shelf
Premium Body Care

• Top-tier body care quality standard
• Evaluated every body care ingredient at Whole Foods Market:
  • Safety
  • Environmental Impact
  • Source
  • Efficacy
• Includes extensive label and fragrance review
The Landscape 8 Years Later

• Currently 4400+ Premium products
  • Started with 1200 products
  • Store-specific product lists available on website
• 400+ unacceptable ingredients
• Greater percentage of top-tier products on WFM shelves
• Increased availability of safer and natural raw materials
• Enhanced customer and vendor awareness

Premium Body Care Products

Highland Park Store, Southwest Region
Whole Foods Market's latest exciting venture into offering our shoppers an enhanced shopping experience and lifestyle choice is with our "Premium Body Care" standards. We've done the research for you by finding the highest quality efficacious ingredients which are safer for our bodies and our planet. We believe that taking the best care of yourself and the environment doesn't have to be a sacrifice! We hope that this will also encourage our vendor partners to invest in developing products that meet and exceed our standards which will be beneficial to our shoppers as well.

To learn more about the Premium Body Care Standards, please visit our website at:

The ingredient lists are subject to change as we learn more about new ingredients and as studies are done. All of our Whole Body products meet our rigorous standards, but the Premium Body Care Standards are for those product lines that have submitted detailed documentation about the products and ingredients and meet our enhanced standards. New products will be added periodically, so this list will change. We hope that you enjoy shopping at Whole Foods Market - now more than ever!

Baby & Child Products
Burt's Bees
- Baby Bee Shampoo and Wash
- Baby Bee Oil - Apricot - 4 oz

Bar Soap
- Alaffia
  - Authentic African Black Soap, Peppermint
- Authentic African Black Soap, Peppermint
Premium Body Care: Effects

• At 8 year anniversary, many egregious ingredients removed from the shelves

• Great recognition for WFM
  • “Until the laws change, a no-brainer way to avoid many risky chemicals in your cosmetics is to shop at Whole Foods.” –Consumer Reports

• Premium is one of the most highly utilized standards in the industry, used as a formulation guide.
Premium Body Care: What is Next?

- Going forward: further fine-tuning
- Premium Body Care 29% of body care
- Still many non-Premium products on shelf
- Goal of moving towards one body care standard
  - Baseline ingredients to ban immediately
  - Baseline ingredients to ban in future
  - Baseline unacceptable ingredients to allow in Premium
Body Care Standards “Makeover”

- Banned from baseline standards January 2017:
  - Oxybenzone
  - Formaldehyde-releasing preservatives
  - EDTA
  - Benzalkonium chloride
- Currently reviewing other ingredient categories
Organic Labeling Standards
Organic Labeling Standards

- All personal care products making an “organic” claim must be certified:
  - “Organic” Lotion: USDA NOP Standard
    - 95% Organic
  - “Made with Organic ___”: USDA NOP Standard
    - 70% Organic, remaining 30% approved by USDA for organic food
  - “Contains Organic ____”: NSF Standard
    - 70% Organic, other 30% approved by NSF for personal care
  - This includes “Organic” in the brand name
Organic Personal Care

- As of September 2012, all organic personal care products in US stores are 3rd party certified.

- Increasing amounts of newly certified products, both to NSF and USDA.

- Store based shopping lists on website.
Unique Position for Retailers

• Gatekeeper
• Educator
• Advocate for customer
• Clear guidance for vendors
• Impetus for positive change
Cosmetic Trends

Glass Cosmetic Containers at the Art Institute of Chicago
Cosmetic Containers

Glass containers were used to store cosmetics, including scented oils and kohl, a mineral compound used to dramatic effect to darken eyelids and eyelashes. Containers for cosmetics were fashioned out of a variety of materials in addition to glass, including metal, ivory, bone, and wood. In his writings, the third-century church father Saint Clement of Alexandria (d. 215) mentions white lead, charcoal, and even the “droppings of crocodiles” as common ingredients for cosmetics, although he must be regarded as a hostile witness at best. Nevertheless, the fact that his writings feature such detail about the use of makeup attests to its ubiquity.

Multicomartment kohl containers were formed when a hollow tube of glass was folded in half, thereby creating two tubular containers from one. Over time, the appearance of these vessels became more elaborate and whimsical, like the larger one shown here with fanciful looped handles and side decoration of looped trails (1949.425). In this case, fashion trumped functionality; the crossed loops of the tiered handle would have interfered with its actual use.
