MONTHLY MEETING SPONSORS:

WE WILL BE ASKING FOR EVENT SPONSORS SOON. BE ON THE LOOK OUT FOR EMAILS AND IN FUTURE NEWSLETTERS

Below is the sponsor layout for the SWSCC meetings.

Sponsorship:

\$1000 (event)

Your company will be allowed 15-20 minutes to promote themselves during dinner
Your company's logo will be present at the meeting
Your company will be mentioned in the newsletter for this event

\$500 (event)

Your company will have 7-10 minutes to promote themselves during dinner
Your company's logo will be present at the meeting
Your company will be mentioned in the newsletter for this event

\$250 (happy hour)

Your company's logo will be present at the meeting/bar
Your company will be mentioned in the newsletter for this event

Do you want to win an Amazon GIFTCARD? Be on the lookout for this picture within this newsletter! The first person to correctly reply with where they saw it will WIN!!

We will announce the winner in the next newsletter.

Email guess to Kimberly.wandell@omya.com

Science Corner

The JOURNAL OF COSMETIC SCIENCE (JCS) publishes papers concerned with cosmetics, cosmetic products, fragrances, their formulation and their effects in skin care or in overall consumer well-being, as well as papers relating to the sciences underlying cosmetics, such as human skin physiology, color physics, physical chemistry of colloids and emulsions, or psychological effects of olfaction in humans. Papers of interest to the cosmetic industry and to the understanding of the cosmetic markets are also welcome for publication. Issues are published online bi-monthly, for a total of 6 issues a year. There are no submission fees to publish a paper in JCS.

<https://library.sconline.org/recent-issues>

SCC Members receive a complimentary subscription to JCS. Nonmembers can purchase individual issues/articles on the issue's page. If you wish to receive complimentary access to the Journal, [Join SCC](#) or [click here](#) to subscribe.

MAXIMIZING SUCCESS: CHOOSING THE RIGHT DIGITAL TOOLS

Article written by Vianney Aguilar Sales Engineer

Lately, the buzz surrounding digitalization and AI has been deafening, and rightly so. The cosmetics industry is experiencing a significant transformation thanks to the integration of digital technologies. Let's delve into what factors are important to choosing the right platform.

Regulatory Compliance:

In the ever-evolving landscape of R&D, having a regulatory compliance feature is not just crucial for success—it's **non-negotiable**.

-Real-Time Monitoring and Reporting: Digital tools provide real-time visibility into compliance status, enabling effortless generation of compliance reports. This allows proactive measures to address compliance gaps.

-Enhanced Data Integrity: Digital documentation offers superior data integrity with features like audit trails and version control, ensuring accuracy and reliability of data—a crucial aspect of regulatory compliance.

-Efficient Data Submission: Digital tools simplify electronic submission of required documentation, reducing time and effort needed to fulfill regulatory obligations as regulatory bodies increasingly mandate electronic data submission.

Sustainability Integration:

• **Environmental Impact Assessment Tools:** Digital tools must include features for measuring the environmental impact of cosmetic products, such as carbon footprint and fair trade considerations. This not only pinpoints areas for sustainability improvement but also enables companies to make informed decisions towards a greener future.

• **Smart Packaging:** Incorporating digital technologies into packaging, the cosmetics industry is improving recyclability, minimizing waste, and efficiently communicating sustainability attributes to consumers.

Integrations with other collaborative platforms:

Seamless integration with other systems, such as ERP, is essential when evaluating collaborative platforms.

Export/import modules: These modules and API integration are essential for smooth information sharing. They automate processes like transferring formulas, saving time, and reducing errors.

Cloud-based platforms: Cloud-based eliminate geographical barriers, enabling seamless collaboration in R&D, boosting efficiency, and fostering innovation.

PLM software or Databases system?

Recently, it has become increasingly confusing for customers to distinguish between PLM software and a database. Even though it may be a SaaS platform, it does not necessarily mean it is PLM software. Databases and Product Lifecycle Management (PLM) software fulfill distinct purposes in data management, especially in the domains of business operations and product development.

Below, we outline the disparities between the two:

	Database	PLM
Purpose	Designed to store, manage, and retrieve structured data efficiently. Provide a foundation for various applications and systems to store and access data.	It is specifically tailored for managing a product's entire lifecycle, from ideation to disposal. It includes features for product design, collaboration, project management, and documentation and often integrates with other business systems.
Scope	Generic tools that can store any type of data, from customer information to financial records to inventory data. They are not specific to any industry or domain.	It is industry-specific and tailored for managing product data and processes. It focuses on aspects such as product design, manufacturing, and compliance.
Functionality	Provide basic functionality such as data storage, retrieval, indexing, querying, and transaction management. They offer flexibility in data modeling and querying.	PLM software offers a range of features specific to product development, including version control, bill of materials (BOM) management, workflow automation, and collaboration tools.
User Base	They are used by developers, database administrators, analysts, and various applications/systems that require data storage and retrieval capabilities.	It is used by product designers, engineers, project managers, manufacturing teams, and other stakeholders involved in the product development process.
Integration	Can integrate with various applications and systems across an organization, serving as a backend data store.	Integrates with ERP systems, CRM systems, and other business applications to streamline processes and ensure data consistency across different stages of the product lifecycle.

In summary, while databases are foundational tools for storing and managing data across different domains, PLM software is specialized software focused on managing product-related data and processes throughout the entire lifecycle of a product.

What about AI?

Let's not overlook the fascinating insights AI offers. How does AI work? It operates as a learning machine, relying on extensive data to predict and achieve remarkable outcomes.

- **Data Analytics and Machine Learning:** Harnessing the power of data analytics and machine learning, companies can analyze vast datasets to formulate more effective and market-driven cosmetic products. Predictive modeling anticipates consumer preferences and trends, guiding proactive product development.

Virtual Testing and Simulation: Utilizing computational models for testing and simulation diminishes the necessity for physical testing, thereby expediting the development process. This approach provides researchers with valuable insights, such as stability testing, before creating physical prototypes.

However, it's crucial to bear in mind that AI is a recent tool, and the process of gathering all this information may require some time to ensure accuracy.

The cosmetics industry is at the forefront of digital transformation, leveraging AI and digitalization to enhance sustainability, innovation, and consumer experience. As these technologies continue to evolve, we anticipate even more exciting developments in the future.

Selecting the appropriate platform and digitizing your R&D operations can potentially save your team 30-40% of their current time.

Let's keep innovating!

Advantages of Membership

Membership with the Society of Cosmetic Chemists (SCC) connects you with professionals who undoubtedly understand the challenges and opportunities of the industry. Our benefits can be categorized into three major reasons why professionals in the cosmetic and personal care industry make the decision to join the SCC.

Education

- Free and/or discounted access to content on the [SCC Media Library and Resource Center](#), the go-to digital platform for journal issues, webinars, annual meeting content, and other resources.
- Complimentary digital subscription to the [Journal of Cosmetic Science](#), our flagship technical publication. The Journal aims to provide readers with high quality, peer-reviewed technical articles covering basic and applied research in cosmetic science, as well as advances in technology and product innovation for cosmetics and personal care.
- Discounted and/or free registration for [Continuing Education](#) in various formats such as live webinars, classroom lectures, hands-on lab instruction, and more.

Networking

- **Exclusive** access to the online [Membership Directory](#), the up-to-date guide of nearly 6,000 contacts - the who's who in the Society.
- Opportunities to participate in a wide range of education and networking events at 19 [Affiliated Chapters](#) across Greater North America.

Events

- Discounted registration to the [Annual Scientific Meeting & Showcase](#), the Society's hallmark event. Drawing more than 1,200 cosmetic and personal care community members and partners each December, highlights include: two full days of education on the latest industry innovations and research; a Showcase featuring more than 100 exhibitors and scientific posters; and multiple opportunities to expand your professional network and connect with cosmetic chemistry experts.
- Complimentary Membership in the [International Federation of the Societies of Cosmetic Chemists \(IFSCC\)](#) - a worldwide federation dedicated to international cooperation in cosmetic science. As a member of IFSCC, you will enjoy discounts to international events

and receive access to both the IFSCC Magazine and KOSMET (housing over 84,000 international abstracts).

Comments from the Editor:

I hope you have enjoyed this new addition of the newly named SWSCC Newsletter "THE SOUTHWEST CONNECTION." If you have questions or comments please reach out to me kimberly.wandell@omya.com
